

Two parallel copper tubes carry a signal that cannot be seen. Ten grey blocks hold the line and mark the distance from Earth to asteroid 16 Psyche, from 39.573.000 to 395.730.000 km. The augmented-reality layer gives the signal back to the room: the field around the line, the pulse crossing the ten milestones, and the asteroid itself, hanging in the middle of the work.

SIGNAL	8,4 GHz · X band · Deep Space Network
MILESTONES	39.573.000 km × 1 ... 10
LIGHT TIME	2 min 12 s 22 min 00 s
CELESTIAL BODY	16 Psyche · 278 × 238 × 171 km
